CHICKEN POX

To make you aware, we have children in KSI who have been diagnosed with Chicken Pox

These are some of the symptoms:

- Chickenpox starts with red spots. They can appear anywhere on the body.
- The spots fill with fluid. The blisters may burst. They might spread or stay in a small area.
- The spots scab over. More blisters might appear while others scab over.

They might get symptoms before or after the spots, including:

- a high temperature above 38C
- aches and pains, and generally feeling unwell
- loss of appetite

Chickenpox is very itchy and can make children feel miserable, even if they do not have many spots. Chickenpox is usually much worse in adults.

It's possible to get chickenpox more than once, although it's unusual.

If you are unsure, always consult your G.P.
